DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "identifying and outlining an object within an image; allocating an object identification symbol to said object; using the allocated object symbol to represent the shape of said object; and allocating said object with a depth" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 24-49 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The present invention provides a new method of encoding a depth map for improving the operations of the applicants earlier image conversion and encoding techniques (specification, page 2, lines 12-14).

Particularly, the new method comprises the following features, which the prior art taken either singly or in combination does not teach:

- using the allocated object symbol to represent the shape of said object and allocating said object with a depth (see independent claim 24);
- defining said object by drawing a plurality of lines across said image, and determining the start and finish positions of each said line, wherein a new line is commenced each time an object boundary is reached, and allocating said object with a depth (see independent claim 37).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
